This course is an introduction to the dynamics and vibrations of lumped-parameter models of mechanical systems. Topics covered include kinematics, force-momentum formulation for systems of particles and rigid bodies in planar motion, work-energy concepts, virtual displacements and virtual work. Students will also become familiar with the following topics: Lagrange's equations for systems of ...

Our staff develops mechanical solutions for multiple industries. From power utilities to the oil and gas industry, we are proud to improve efficiency and productivity through expertise in engineering dynamics, structures, materials, and fluids systems. Our mission is to improve the safety, reliability, efficiency, and life of new or existing mechanical components and systems for the benefit of ...

Mechanical engineering is the discipline that applies engineering, physics, engineering mathematics, and materials science principles to design, analyze, manufacture, and maintain mechanical systems. It is one of the oldest and broadest of the engineering disciplines.. The mechanical engineering field requires an understanding of core areas including mechanics, dynamics, thermodynamics ...

Undergraduate Programs Bachelor of Science in Engineering Program Educational Objectives: Aerospace Engineering. Graduates will enter and successfully engage in careers in Aerospace

Engineering and other professions appropriate to their background, interests, and skills.

### **Department of Mechanical and Aerospace Engineering - Case**

The Department of Mechanical and Materials Engineering (MME) provides students with the knowledge to influence virtually every aspect of human life.

### **Mechanical and Materials Engineering**

Engineering physics or engineering science refers to the study of the combined disciplines of physics, mathematics and engineering, particularly computer, nuclear, electrical, electronic, materials or mechanical engineering. By focusing on the scientific method as a rigorous basis, it seeks ways to apply, design, and develop new solutions in engineering.
